

An impressive source of training

On February 5 this year, a tutor-pedagogue and psychologist Sagdullayeva Dilorom conducted a methodology on "Animal Beings", "My Tagam" with students. The method of "non-existent beast" determines the degree of aggressiveness, self-esteem, and lack of qualities of the student. The method of "My stamp" defines the slogan, interest, work, value and purpose of the student. The methodology was psychologically diagnosed and students were given the necessary consultations. GTA, ASCET, GIM students participated. The psychological training was very interesting. He was invited to go in for an individual study with a problem.
