

Hardworking Teacher

Having the title "Hardworking and Kind" is a great honor and happiness for every teacher and mentor. People with these qualities are always worthy of note. Honoring the privilege that he receives is also a sacrifice. It does not mean that mercy will not be heard until you have the trouble. It is not a secret to love his job, to be close to his relatives, to his colleagues, and to be generous to his workforce, community, and family. Batirova Lolitta Anvarovna, Senior Lecturer at the Department of "Electricity Supply and Renewable Energy Sources" of our institute welcomes their blessed age 60 on April 7.

Lolitta Anvarovna is one of the best teachers in the country who has made a worthy contribution to the training of qualified personnel for agriculture and water industry for 30 years. It is not a secret that they are working hard in training highly qualified specialists and strengthening the material and technical basis of the system and in the learning process. So far, many of their theoretical and scientific-popular articles and textbooks have been published in their authorship.

Nation's dignity can not be inherited. Only people who can work honestly, selflessly, and only for a lifetime deserve it. They are proud of their community and friends, their brothers and sisters because they are such people. We wish Lolita Anvarovna a great future, longevity, health and well-being in the future of our country!

Report by an associate professor of department of "ESRES"
