

Trainings on three subjects

On May 2, 301- 302-302a groups in specialty of "Electrification and automation of agriculture" of faculty "Agriculture and Water Resources Energy" were provided trainings on "Labor occupation", "Fundamentals of energy saving" and Laboratory lessons on "Electrical equipment operation and maintenance" were organized. At the enterprise "Hydroponics Center" from 10:00 to 14:50 students were informed about modern electrotechnology in the production of new agricultural products.

Students were introduced to energy-efficient electric power stations on the subject "Basics of Energy Efficiency". They were acquainted with the principles of modern electric motors for the subject "occupation". Explained to the students the concept of "Electric equipment operation and maintenance" on the electrical control equipment and ramps. The lessons were conducted by O. Matchonov and N.Markaev, assistants of the department "ET and UEE".
