

Visit to the Museum of Natural History

The State Nature Museum of Uzbekistan under the Ministry of Culture and Sports of the Republic of Uzbekistan is the oldest scientific and educational institution. It was founded on July 12, 1876. Senior teacher of the chair "Soil science and agriculture" Durdona Alikarieva visited the nature museum on May 2, 2019 with the group of 203 students of the Faculty of Education of AWEO in the subject "Ecology and environment protection".

Students observe the museum's exhibits and once again witness the beauty of the country, not only in photos, but also in diorama and exposition. The visit to the museum was exciting. The teacher and the students acknowledged that the museum has a huge contribution to educating young people in the spirit of love.

Alikarieva Durdona, Senior Lecturer at the Department of Soil Science and Agronomy at GM Faculty.
