

Cooperation of science and practice

The fourth-year students of the group 409 who are majoring “Electric energetics” in the faculty of ESAWR have been to the station with KELES 220/110/10 kV in order to link educational laboratories with manufacturing. The students were supervised by Sanbetova and Qilichova. This process has made a basis for learning theoretical sciences accompanying with practical ones.

R.Jumaniyozov, the press-secretary of the institute
